

LAB 2

1. Open the file lab_2_name_id.html. Add your name and the date to the file.
2. After the body header, create a table using the table element. Apply the following features to the table:
 - Add a caption with the text "August 1, 2023".
 - Include a column group with two columns, one with the id "firstCol" and another with the id "hourCols", spanning 9 columns.
 - Insert a table head group containing a single row with th elements displaying "Conference Room" and the times "8:00am" through "4:00pm" in one-hour increments.
 - Create a table body group containing four rows for each of the four conference rooms shown in the below picture.
 - Inside each row, place a th element with the name of the conference room.
 - Following that, insert the groups reserving the room within td elements.
 - If a group has reserved a room for more than an hour, make the td cell span the number of columns for that reservation.

Result for your reference:
